

I Keep an Eye on My Water System.

Do You?

**ACV Assure™
Monitoring System**

A reliable solution that helps water utilities monitor operations, pressure, flow, and loss, all within their budget.

WATTS®

ACV Assure™ Monitoring System

ACV Assure™ monitors your water distribution system and sends you an email or text alert if there's a pressure or flow issue. Rest assured with instant alerts and important monitoring right at your fingertips.

Easily Manage Your Water Utility Assets

- Continuously monitor system pressure and flow
- Get insight into operating conditions with instant text and email alerts
- Access your full alert history
- Set up service reminders
- Register to set up geo-locations so you can map your water distribution system monitoring equipment

A photograph of a water utility valve assembly with a sensor mounted on it. The valve is blue and red, and the sensor is white and black.

Rest assured with reliable monitoring today!
