Electric Motorized Valve by Watts

Series LFEMVII-6400SS

LFEMVII-6400SS series 2-Piece, Standard Port, Lead Free, Motorized Ball Valve

This valve is commonly used for commercial and industrial applications. The LFEMVII -6400SS offers an electrically actuated motor which is available in 115 or 24 VAC models and a stainless steel ball valve available in 1/4" to 2". This product includes a visual position indicator, manual override, and the ability to be mounted either in the vertical upright or horizontal plane. The LFEMVII-6400SS ball valve is a reliable method to control the flow of steam, water, or air.

Features

- Ready-to-connect actuator (no special wiring required)
- External plug-in connectors for simplified wiring and easy serviceability.
- Motor available in 115 VAC or 24 VAC
- Standard auxiliary DPDT switches, 5 amps rating @ 115 VAC
- NEMA 4X Enclosure
- Integrated anti-condensation heater
- Electronic Torque Limiter
- 316 stainless steel ball and stem bottom loaded blowout proof stem
- Adjustable PTFE packing
