

Smarter, Safer Backflow Prevention is Here

Stay ahead of problems with smart and connected performance monitoring

Available Pre-Installed on IoT Series LF007 and LF709 Backflow Preventers and as an Upgrade Kit

- ✓ SentryPlus Alert® Technology Integrates with BMS Systems for Continuous Monitoring
- ✓ Sensors on Test Cocks Assess Pressure 4x per Second
- ✓ Part of our Smart and Connected Family of IoT-Enabled products

Instantly Add Another Layer of Protection to Your Backflow Prevention System

Smart and Connected Performance Monitoring Keeps You in the Know

- 1 Enjoy an easy purchase
- 2 Activate the Test Cocks Pressure Sensors
- 3 Gain 24/7 Insight into Your Backflow Preventor's Performance

Available on These Assemblies

LF007

LF709

Once sensors are activated, your backflow preventer assembly is under constant surveillance. This connection allows for insight into performance while giving advanced warning of potential problems. 24/7 monitoring with BMS integration keeps you efficient and two steps ahead of a backflow event.
