

ICE isn't NICE

Easily Add Freeze Detection to ANY Cold-vulnerable Water Equipment

For real-time notifications of freeze conditions, freeze sensors can now be installed anywhere water flows. And for the best backflow protection available, freeze sensors come preinstalled on select pressure vacuum breakers (PVB) and dual check backflow preventers*. And now, with new Wi-Fi capability, you can receive text, email or BMS/IMS alerts wherever you go.

Monitor Your Plumbing Components 24/7:

Receive real-time alerts when freezing conditions are detected

Prevent Freeze Damage:

Replacing damaged equipment is costly and time-consuming

Reduce Water Waste:

Avoid the mess of flooding that follows freeze damage

*Freeze Sensor kit sold separately.

WATTS[®]
CONNECT. CONTROL. CONSERVE.

Smarter Prevention, Better Protection

How it Works:

- 1 For backflow applications, scan QR code below to purchase your Freeze Connection Kit
- 2 To add freeze protection anywhere water flows, purchase a new Freeze Sensor Kit
- 3 Activate your sensor and enjoy reliable freeze monitoring and alerts via your IMS/BMS or connect to local Wi-Fi for real-time text/email alerts

When the mercury rises and temperatures thaw, equipment that's cracked from freezing can leak and cause further damage. With smart and connected freeze detection, you can anticipate icy conditions and prepare accordingly.

Don't let unexpected freezing destroy your system. Freeze detection you can rely on is here for you.
